Connecting the Towns

A town without adequate local telephone service is handicapped in the promotion of local commercial and social activities.

Likewise, without Long Distance connections, it suffers a severe handicap in its commercial and social relations with other communities.

Every business community is entitled to this modern and popular means of transmitting intelligence.

In the very nature of our business, and under our charter obligations, it is the duty of this company to afford facilities for Long Distance communication, so far as our ability may permit.

We must do this, notwithstanding that the towns are often separated by rugged mountain ranges and the cost of construction and maintenance is enormous.

And every town connected helps to round out our system, thus adding to the value of the service.
